Employment Objective

Part time Remote Covid-19 Contact Tracing

Brief BIO

I am an Emeritus Human Sciences Professor from the University of Houston-Clear Lake (UHCL) - retiring from full-time employment in 2000. I hold an M.S. in Creative Design Engineering from Stanford University (1963) and Ph.D. in Social Psychology from Northwestern University (1967).

My relevant postdoctoral career has included:

- A one year postdoctoral fellowship with Dr. Carl R. Rogers at the Western Behavioral Sciences Institute, where I became proficient at facilitating humanistic psychology growth groups and empathic active listening.
- 10 years as a social systems researcher at the Stanford Research Institute (now SRI International) where I pioneered group social visioning facilitation methods for strategic planning and organization development, with expertise in motivating people to undertake challenging objectives they have much resistance to.
- 23 years teaching forecasting, strategic planning, organization development and group visioning, with expertise in helping people to envision and realize wise futures in spite of challenging trends and societal crises.
- 20 years post-retirement writing and independent development of subtle tools for insight, foresight and wise-choosing. Many training workshops and journal articles have stemmed from this work.
- Oct 30, 2020 - Successfully completing the COVID-19 Contact Tracing online course put on by the Department of Epidemiology of the Johns Hopkins University Bloomberg School of Public Health.
